

ISO45001:2018 – Occupational Health and Safety Management System (**OHSMS**)

ISO 45001:2018 assists companies improve employees' safety, reduce workplace risks and create better & safer working conditions. The standard is structured same way with ISO9001 for easy integration.

How **OHSMS** assists your organization?

Accident Prevention & Regulatory Compliance

Implementation of ISO45001 sets common goals for organization. Workers are trained consistently to meet all process requirements. Training makes workers aware of processes to identify risks, and conditions that are imminent and serious danger to life or death.

Reduce Costs & Downtime

Health & Safety performance is improved throughout the implementation process. Employee morale is improved as their welfare are taken care off. Injury claims will be reduced and therefore organizations spending lesser for their insurance premium. Reduction of employees absentee improved operational efficiency as well.

Process Approach

ISO45001 promotes process approach and Plan-Do-Check-Act (PDCA). It is a strong model for organizations' improvement that is sustained, rather than just a one-time quick fix.

Continual Improvement

The main goal of ISO 45001 standard is continual improvement of the Occupational & Health Management System. (OHSMS)

Customer Satisfaction As Key Of All Businesses

Certified organization would be able to demonstrate its ability to consistently provide products and services that meet customer and applicable statutory and regulatory requirements. Through effective implementation of system and continuous improvement through processes and the system itself, organization could demonstrated conformity to customers, statutory and regulatory requirements. Organization could enhance customer satisfaction in long run.

■ Process Approach

Plan

Planning is one of the biggest parts of the QMS. First, organization should understand the needs of stakeholders & interested parties. Planning includes resources, communication, and control of documents.

Do

Planning is useless unless the plan is carried out.

Check

Internal & External audit to evaluate if organizations' products & services are meeting client's requirements.

Act

Actions needed to address any issues found from Internal & External Audit, to understand the root causes and perform correction & corrective actions for continuous improvement.

Overall, the PDCA model serves as a tool for organization to improve their objectives through waste reduction and more efficient use of resources.
